Power Networking

Secrets for Personal & Professional Success

This high energy, interactive and insightful LifeShop creates an exciting opportunity for participants to understand and practice the power of networking!

"Networking is an attitude, an approach to life. It is not just a "thing to do." Instead it focuses on the way in which you relate to the people and the resources around you! Networking has many benefits, but among the most important is that is an efficient way to accomplish big goals. So if you have big goals and dreams about which you want to accomplish, power networking is for you. The bigger the goal, the more useful networking will be for reaching that goal. And with networking, you will attain success with greater ease, joy and efficiency." Sandy Vilas, Author of Power Networking

As a result of this LifeShop participants will:

- Have a clear definition of what networking is (and what it is not!)
- Understand the importance and power of networking.
- Clearly understand the core principles of networking.
- Know the important values and principles in their lives and how they apply to networking.
- Learn about their personal networking style.
- Develop a personal introduction to be used in networking venues.
- Assess current network and develop an action plan for improving their networks.
- Gain immediate experience with how to network and apply key learning that same day.
- Build confidence in networking skills and increase capabilities immediately.
